Attention: Beverly Friedman

The attached application for patent term extension of U.S. Patent No. 6,031,017 was filed on May 18, 2011, under 35 U.S.C. § 156. Please note that a patent term extension application for U.S. Patent No. 5,763,504 and U.S. Patent No. 6,602,859 for PMA P080020 for the medical device Gel-One® (sodium hyaluronate) was filed concurrently, pursuant to the provisions of 37 C.F.R. § 1.785.

The assistance of your Office is requested in confirming that the product identified in the application, Gel-One® (sodium hyaluronate), has been subject to a regulatory review period within the meaning of 35 U.S.C. § 156(g) before its first commercial marketing or use and that the application for patent term extension was filed within the sixty-day period beginning on the date the product was approved. Since a determination has not been made whether the patent in question claims a product which has been subject to the Federal Food, Drug and Cosmetic Act, or a method of manufacturing or use of such a product, this communication is NOT to be considered as notice which may be made in the future pursuant to 35 U.S.C. § 156(d)(2)(A).

Our review of the application to date indicates that the subject patent would be eligible for extension of the patent term under 35 U.S.C. § 156.

Inquiries regarding this communication should be directed to the undersigned at (571) 272-7755 (telephone) or (571) 273-7755 (facsimile).
